

New Laptop Computers for the 2010-2011 School Year

For the 2010-2011 school year, we will offer two different laptop package options for CDS students through Richard's Computer in Fairfax, Virginia.

Package 1 will include a Toshiba Portégé M-780 Tablet (specifications listed below) and will include a 4-year complete care warranty. This is a high value package that will equip the students with everything they need to make the most of the tablet program throughout their high school years.

Package 2 will include an HP 5102 Mini-Note Netbook (specifications listed below) and will include a 2-year complete care warranty. At the end of the 2nd year we will have another 2-year Netbook package for purchase at that time. The Netbook is a standard laptop and does not have the tablet functionality, but it is an affordable alternative that will provide the students with everything needed to assist them with their school work.

If you would like to see demo units of each of these laptop models, we will have them available in the technology department in the high school media center on Tuesday, June 1st from 9:00 – 11:00 am, or Thursday, June 3rd from 1:00 – 3:00 pm.
